Letter of commitment to the priorities of the Concordat for the Environmental Sustainability of Research and Innovation Practice

I, Professor Frances Corner, Vice-Chancellor, on behalf of Goldsmiths, University of London, confirm our commitment to the priority areas outlined in the Concordat for the Environmental Sustainability of Research and Innovation Practice.

Goldsmiths fully supports the priority areas outlined in the concordat. We will deliver against all the priorities in practice and recognise our responsibilities as a signatory, as set out in the concordat.

By signing this concordat we recognise the need to change how we conduct research and innovation as well as promote wider solutions. We also agree to take shared action now and into the future to reduce and eliminate our own environmental impacts and emissions and achieve the transition to sustainable practices.

The climate crisis is one of the biggest threats our society faces and Goldsmiths has already publicly pledged to becoming a carbon neutral organisation and to supporting meaningful climate action through research, teaching and innovation. Our commitment to be a signatory to the concordat underscores our ambition to deliver real-world change and to work collaboratively across disciplines and sectors to address the complex local and global challenges posed by the climate emergency.

Yours sincerely,

Signature

Professor Frances Corner
